Generation Like:

Summary: How advertisers and big commercial brands are exploiting teenagers using social media and making big dollars. What really happens every time you or, more crucially, your children press the 'like' button? This week on Four Corners, a PBS Frontline special report by Douglas Rushkoff examines how the search for identity in teenagers has migrated to the digital world with profound implications for us all. What he reveals is a cat and mouse game played by corporations and young consumers with billions of dollars up for grabs. The program shows how corporations have co-opted social media into their marketing campaigns for products ranging from chocolate biscuits to movies. It follows the modern stars of Facebook and Twitter, who have parlayed their obsessions with the internet and popular culture into lucrative careers. We see how 'likes' and 'followers' are effectively traded between stars seeking bigger and better online profiles. Do young people think they are being used? Are they taken in by the prospect of achieving their own celebrity? This is a fascinating look at the modern teenager and the corporations that stalk and sell to them. (ABC TV guide)

The rites and rituals performed in Australia today are determined by our culture, values and beliefs. But how do we carry our loved ones on their final journey? How do we honour them in death? And how do we grieve?
In the first episode Compass visits a small, Anglican, country farewell for a much loved local; and a no-frills Muslim funeral for an asylum seeker. Rated PG.

The only way to change her life, is to leave Porpoise Spit & find a man. The Gender mission

Summary: When the young women of the Norwegian Border Guard turn in after a long day patrolling along a stretch of their nation's northern border with Russia, chances are there will be men in the room. They're the fellow soldiers they've been working with, training with and sometimes ordering around in the field. Despite the seamless sleeping arrangements, the conflicting habits of males and females, it all seems to work. Harassment and sexual assault, already comparatively low in Norway's armed forces, is on the wane. Led by a formidable front-line of women, including Prime Minister Erna Solberg and her predominantly female cabinet which includes defence Minister Ine Eriksen, Norway is leading the charge to an inclusive, cohesive unisex defence force. They want the armed services to become as progressive and gender-blind as the top echelons of government. (From ABC program guide)
